## DETAILS

# Name

**B SHRINIVAS** 

#### **Roll Number**

KUB23CSE018

## **EXPERIMENT**

**Title** 

SPACE COUNTER

#### Description

You have been given the task of making the content on a social media platform more user-friendly. Your task is to find and return an integer value representing the count of the number of spaces in a given string S.

#### Input:

A string S

#### **Output:**

Return an integer value representing the count of the number of spaces in a given string S.

#### **Example:**

#### Input:

Storet

Hello World Hey

#### **Output:**

2

### **Source Code:**

```
def count_spaces(s):
    # Count spaces in the string
    space_count = s.count(' ')
    return space_count

# Example usage:
input_string = input().strip() # Read input
result = count_spaces(input_string)
print(result)
```

#### RESULT

5 / 5 Test Cases Passed | 100 %
